- Python

EXPERIENCE

SENIOR FULL STACK ENGINEER, 03/2024 - Current
Bayone Solutions, Gurugram, IN

- Collaborated with Rivian Client on a pivotal project.
- Utilized by Amazon for managing employee timesheets.
- Manager managed project allocations on behalf of employees.
- Worked on technologies such as React, Node, TypeScript, Python, PostgreSQL, and MongoDB.

SENIOR SOFTWARE DEVELOPER, 04/2022 - 12/2023
Noumena Global, US, US

- Integrated the Dwolla API to provide seamless bank and wallet payment solutions.
- Utilized the Plaid API to ensure secure bank account verification for user registrations.
- Integrated Stripe for a robust card payment solution within the Noumena platform.
- Implemented Chargebee integration for streamlined subscription management.
- Developed the Noumena.pro platform for entrepreneurs to register their businesses with Noumena.
- Implemented features such as events, messages, and payments to enhance the user experience.
- Used Node.js and JavaScript for development.
- Leveraged PostgreSQL for efficient data management.
- Employed TypeScript for enhanced code maintainability and scalability.
- Utilized GraphQL for optimized data retrieval and manipulation.
- Implemented microservices architecture to improve modularity and scalability.
- Hosted the application on AWS for a reliable and scalable infrastructure.
- Integrated Stripe for seamless, secure card payments.

SOFTWARE DEVELOPER, 04/2020 - 04/2022
Skuad Lab India Pvt. Ltd, Gurugram, IN

- Developed the Skuad Hire/Pay platform (skuad.io) to streamline the hiring process for Skuad and client companies.
- Managed candidate records, including resume details, and interview tracking.
- Implemented features for contract creation and payment between vendors and clients.
- Enabled cookie-based authentication for secure user access.
- Built an identity service for user login and authentication across services.
- Integrated Google Analytics for tracking user activities within the platform.
- Utilized PandaDoc for seamless contract signing between two users.
- Designed a platform for companies to hire candidates, sign contracts, and facilitate payments.
- Used Node.js, React, and JavaScript for frontend and backend development.
- Implemented microservices architecture for scalability and modular development.
- Employed TypeScript for improved code quality and maintainability.
- Implemented GraphQL for optimized data querying.

SOFTWARE DEVELOPER, 01/2019 - 04/2020
Appstreet Software Pvt. Ltd, Gurugram, IN

- Designed and implemented the Linex system, revolutionizing customer loans and loan repayments for Cardekho.
- Developed the Connex system, greatly improving the efficiency of car resale through auctions.
- Managed transactions and maintained ledger items for both Linex and Connex systems.
- Defined and developed core logic for modules, establishing a solid foundation for the systems.
- Implemented secure user access with Google-based authentication.
- Managed backend schema for different entities, ensuring data integrity, and organization.
- Applied business understanding to create customized solutions for client needs.
- I worked as a Backend Developer (Node.js) for Cardekho, specializing in selling and purchasing old cars through auctions.
- Utilized Node.js, React, and JavaScript for seamless system development.

ASSOCIATE IT, 07/2016 - 12/2018
